

5 Good Reasons To Hire ViSKon

1. We Know Environment and Development Assistance

As project inventors, formulators, reviewers, appraisers and implementers we know all aspects of the project cycle from first-hand experience. We have clients in the private sector, the public sector and among a wide variety of international donor organisations.

As business owners ourselves, we understand the budgetary and time constraints that companies face. We'll help you define your goals in clear, concrete terms and then work with you to deliver a realistic and affordable solution.

2. Worldwide Experience

Hire ViSKon and you'll get a team of experts with lots of experience, and who are used to working together giving a smooth and effective teamwork in terms of quality and timeliness.

3. Reliable, Dependable, and Available

At ViSKon, we pride ourselves of always delivering high quality work on time and we go out of our way to meet our clients' needs and requirements, considering both letter and spirit of the job description.

4. We Listen

We start a job by learning and listening, not telling you how to do it. We'll establish your objectives, and then interview your project partners to find out what they want.

5. An Objective Approach

We understand the realities of complex projects/programmes in international settings. Project stakeholders have different agendas. Governments want one thing, NOGs another, the private sector a third etc. ViSKon brings a fresh set of eyes and an unbiased viewpoint. We'll create a dream team by unifying your staff's valuable perspective with our objective expertise, bringing on board the right professional expertise - also from outside ViSKon if this provides the optimal team.
